

# EXPANDED FUNCTION (EF) MODULE

AVAILABLE ON:  
MODULAR Series

## We can help you Control your Business, instead of your Business Controlling You!

The **NEW** Extended Function (EF) Module allows Business Owners more control over their self-service business, by transforming the Standard Change-Makers' "simple-function" Modular Series changers into full-function machines. Further, the EF Module will allow you to interface with additional "Plug & Play" modules (as they become available).

The EF Module has soft pad buttons interface, with an easy-to-read two line LED screen. It is easy to navigate and provides immediate feedback for programming changes, security settings and audit reports. All encased in a metal housing for added protection.

Here are some of the features available in the Expanded Function Module:

- ◆ Fast Vend Shut-Off / Auto Reset Control
- ◆ Set High / Low Security Acceptance Levels
- ◆ "Dollars In" and "Coins Out" Audits
- ◆ Unique Machine Identification Number
- ◆ Built-In Time & Date Stamp
- ◆ Complete Auditing Functions
- ◆ Multiple Dispense Settings (*Bonus Tokens*)
- ◆ Last Twenty Bill Denominations Accepted
- ◆ Error Codes in Plain Text & Error Log
- ◆ Portable Audit Printer Compatability\*

#### NOTE:

The Expanded Function Module has a unique identification number and therefore is not portable between machines. For hard audit accuracy, each machine will require its own EF Module.

*\* The EF Module allows for use of the **Portable Audit Printer** (sold separately) with the Modular series change machines. The Portable Audit Printer prints hard copy receipts of machine audit information, and is portable from one machine to another.*

#### DIMENSIONS:

7.625"H x 4.125"W x 1.5"D
